Accomplishment:

Projects:

1. **Java Swing AreaCalculator Project**
   Issued On: 11/10/2023
   URL: https://github.com/arafat-rahman17/AreaCalculator
   The Area Calculator, developed using Java Swing, calculates the area of geometric shapes like rectangles, circles, and triangles. It features a user-friendly interface for quick and accurate results.
2. **Personal Portfolio Project**
   Issued On: 15/07/2024
   URL: https://github.com/arafat-rahman17/My_portfolio_website
   Built a responsive personal portfolio website using HTML, CSS, and JavaScript. The website showcases my skills, projects, and contact information. It includes smooth scrolling, dynamic sections, and an interactive contact form. The project helped me practice front-end web development and improve user interface design.
3. **Movie Recommender System ML Project**
   Issued On: 10/01/2025
   URL: https://www.kaggle.com/code/arafat1746/movie-recommender-system-ar
   The Movie Recommender System, developed using Machine Learning, suggests movies based on user preferences and viewing history. It employs algorithms like Collaborative Filtering and Content-Based Filtering to provide personalized and accurate recommendations.
4. **Bengali Language Spam Detection System**
   Issued On: 22/01/2025
   URL: https://www.kaggle.com/code/arafat1746/bengali-language-spam-detection-system
   The Bengali Language Spam Detection System uses advanced Natural Language Processing (NLP) techniques to identify spam messages in the Bengali language. This system is designed to enhance communication security and streamline spam filtering for Bengali-speaking users.
